

## **Junior International Standard Accuracy Contest**

**The need:** The present distances of 15 and 20 meters is often too great for many young throwers to obtain a meaningful score.

### **Guidelines:**

1. The ISAC target shall be used.
2. The throwing distances shall be 10 and 15 meters.
3. The age range for participating shall be under 10 years of age.
4. A junior participant shall be allowed to throw alone.
5. If a Junior score sheet is not available, the regular score sheet will be used with appropriate notations.
6. Participating in a Junior ISAC rules out participating in a regular ISAC for that day.

**According to the ISAC Guidelines, a participant may only throw one ISAC per day.**

7. All other ISAC rules shall apply.
